About me

Software Practical engineer, a graduate of Alqasimy College. Software engineers course, seeking a career in a high-tech corporation that will enable me to grow, learn, develop, and contribute to the field of software development and testing.

personal skills

I have strong academic and social skills.

I also have a work ethic and learn quickly.

Education

Graduated from Al-Qasmi College, Baka, Israel | 2019 - 2022.

Software engineering studies with honors,
final grade 94.

projects

My graduation project in | Al Qasmi College was "**Agenda**".

The project includes different interfaces, each with its own different functions.

The system is built to make things easier for the user.

I used the Java language to write the program using Android Studio, a database managed by SQLite.

My program is on GitHub.
